DETAILED ACTION

Response to Board Decision

1. This action is in response to the Board Decision mailed December 21, 2004.

Examiner regrets the untimely reopening of the case and withdraws the previous rejections to further prosecute the claimed invention. Claims 2-9 and 11-12 are pending in this case, with claim 11 being withdrawn as a non-elected invention.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 2-9 and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 and 11-16 of U.S. Patent No. 6,723,406. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both include a masking material

comprising a heat resistant adhesive tape comprising a paper support coated with an adhesive, where the adhesive tape has a heat resistance at a temperature of up to 130°C and is 15-75 mm wide. Although U.S. 6,723,406 does not explicitly teach a masking paper adhered to and only partially covering said one side of the adhesive tape, the reference does teach the masking sheet is folded so it can be folded against the material in accordion fashion (claim 7) which is interpreted as being capable of only partially covering the adhesive tape.
